OC-M83-074
27 January 1983

MEMORANDUM FOR: Deputy Director for Administration
FROM: William F. Donnelly
Director of Communications
SUBJECT: Weekly Report

25X1

5. The first production units of the STATMUX and 300 bps Barry Modem were received and are being evaluated. The STATMUX is

a new multiplex system designed to improve network efficiency; the Barry Modem enhances Medium Speed High Frequency (MSHF) operations.

6. The initial meeting of the CRAFT/Communications Interface Task Force was held on 17 January 1983. Representatives from OC and the DO are working together in this effort.

7. The recent increase in the number of polygraph operators will allow 24 applicants for OC positions to receive their polygraph interviews one or two months sooner than expected. This is good news in its own right, but we also hope that the number of people who now drop out of processing because of the long waiting period will decrease as the waiting period decreases.
